Scutum Capital AG:

- Quality of Pyrolyx-Carbon Black meets expectations
- Scutum Capital AG is now listed at the Open Market of the stock exchange in Düsseldorf

Scutum Capital AG, Munich: After the successful start of operation of the first industrial reactor line in Drunen (NL) and an extensive trial run in March 2012, samples of the recycled products Carbon Black, Oil and Gas were taken. These samples were passed on to external, independent laboratories and institutes in order to conduct material-tests and analysis.

The purpose of the tests was, on one hand, to determine if the chemical composition of the single output-fractions met the results achieved by the pilot reactor and, on the other hand, to conduct first rubber technological examinations.

Niels Raeder, Member of the Board of Scutum Capital AG: “The different test results are now available and they confirm our expectations of the Pyrolyx-technology. All of the recycled products met at least the quality of the successful test results of the materials achieved by the Pyrolyx-pilot-reactor in 2010. We can even proudly inform our shareholders, that a majority of the single analysis led to the conclusion, that we were able to further improve the quality of the recycled products. Starting in May 2012, samples will be sent to leading international Carbon Black-, Rubber- and tire-manufacturers for further product- and application-tests.

Starting on April 12, 2012, shares of Scutum Capital AG are officially listed in the open market of the stock exchange in Düsseldorf. The lead broker is Schnigge Wertpapierhandelsbank AG.

Scutum Capital AG owns all intellectual property related to the Pyrolyx environmental technology, especially one patent application and specific process know-how. This unique, innovative process in the field of environmental technology is aimed at commercially recycling valuable raw materials such as Carbon Black, oil and gas from common rubber resins that are produced from

old car tires. Under the domain www.pyrolyx.com detailed information on the Pyrolyx environmental technology and on the spectrum of Pyrolyx-services is available.
