**Dr. Ulrich Sattler Joins Pyrolyx as COO**

Munich, June 3, 2013

Pyrolyx AG has appointed Dr. Ulrich Sattler its new Chief Operations Officer with effect from June 1, 2013. Dr. Sattler will take charge of production, technology and process development. A chemist from the city of Essen, Dr. Sattler has previously held senior positions at international chemical corporations and is a prominent specialist in carbon black production.

Dr. Ulrich Sattler earned his high international reputation in setting up production facilities and process optimization at for instance Degussa in Frankfurt and Evonik in Sweden. He has worked successfully in Germany and abroad as head of technical controlling and CEO. Most recently, he was at the helm of an IT company based in Hanover specializing in industrial automation. An expert in carbon black production, his publications include a patent for nanostructured particulate, for which he received the Degussa Carbon Black Award.

Pyrolyx AG has successfully completed all the trials for the commercial recovery of carbon black. The Munich-based company is now engineering its first large-scale industrial plant for the continuous production of carbon black from end-of-life tires. “The fact that such an eminent specialist as Dr. Sattler is joining us underlines the importance of the outstanding technological developments of the past few months and the success of the tests recently concluded,” declared CEO Niels Raeder.

## About Pyrolyx

Pyrolyx AG is a Munich-based company specializing in practical and applied research into environmental technology.

The company has developed a unique process that enables valuable raw materials such as carbon black to be made from commercial rubber granules produced from, for instance, end-of-life tires. Carbon black is used to manufacture tires and various industrial rubber articles. The Pyrolyx process enables a sustainable closed material cycle for the first time.

Pyrolyx owns all the intellectual property rights to Pyrolyx environmental technology and has various patents pending concerning the industrial production of carbon black. Pyrolyx AG is quoted on the Primary Market of Düsseldorf Stock Exchange.
