

Pyrolyx AG: Capital increases successfully carried out

Munich, July 7, 2015

The capital increases agreed on June 1, 2015 have been successfully executed. The company's share capital now totals €555,264.00.

The capital increase in kind amounting to 104,000 shares was entered in the commercial register on June 11, 2015.

The cash capital increase involving the issue of 39,577 shares at an initial price of €103.00 each making a total of €4,076,431 was oversubscribed and was entered in the commercial register on June 30, 2015.

Following the takeover and integration of cct Stegelitz GmbH into the Pyrolyx Group, the company will become the world's biggest manufacturer of rCB (recovered carbon black). rCB is obtained from end-of-life tires and used to make new ones as well as other rubber and plastic items. The patented process protects the environment since far less CO₂ is emitted than in conventional carbon black production. Pyrolyx AG will build another ultramodern manufacturing facility alongside the existing plant at cct Stegelitz GmbH's production site.

Pyrolyx AG

The Pyrolyx Group is the world leader in the extraction of rCB (recovered carbon black) from end-of-life tires. Conditioned rCB is used to manufacture new tires as well as in the plastic and technical rubber industries.

The Pyrolyx Group's eco-friendly technology provides an answer to the problem of how to dispose of and recycle the world's growing volume of disused tires. Compared to the conventional production of carbon black, the Pyrolyx method enables CO₂ emissions to be reduced by up to 2.5 tonnes per tonne of CB. Pyrolyx AG's manufacturing operations take place within a closed recycling loop for the tire industry. Byproducts arising during production are reused either as fuel in the manufacturing process or to make other products, ensuring that nothing goes to waste.

In 2015, Pyrolyx AG acquired cct Stegelitz GmbH in its entirety. Pyrolyx is now increasing manufacturing capacity at the site in Saxony Anhalt where cct GmbH has been producing rCB in a batch process since 2012. The acquisition makes the Pyrolyx Group the only company in the world to offer both continuous and batch production, meaning it can serve all addressable carbon black markets. Production in Stegelitz is ISO 9001:2008 and ISO 14001:2004 certified.

Pyrolyx owns all the intellectual property rights to Pyrolyx environmental technology and has various patents concerning the industrial production of carbon black. Pyrolyx AG is quoted on the Düsseldorf Stock Exchange (WKN AOMFXR).
