

Pyrolyx AG: Capital increase from company funds at a ratio of 1:4

Munich, February 29, 2016

The capital increase from company funds at a ratio of 1:4 resolved by the Annual General Meeting of Pyrolyx AG on October 15, 2015 will be completed on February 29, 2016. The company's share capital will rise from hitherto €561,241 to €2,806,205. Shareholders will receive four new Pyrolyx shares for each Pyrolyx share in their portfolios.

A total of 2,244,964 new no-par value bearer shares with a nominal value of €1.00 each will be issued to shareholders at a ratio of 1:4. The new shares will carry dividend rights from January 1, 2015. The resolution and the amended Articles of Association were entered in the commercial register of Munich Local Court on December 2, 2015 and are therefore effective.

Pyrolyx AG

Pyrolyx AG is the world leader in the extraction of rCB (recovered carbon black) from end-of-life tires. Conditioned rCB is used to manufacture new tires as well as in the plastic and technical rubber industries.

Pyrolyx AG's eco-friendly technology provides an answer to the problem of how to dispose of and recycle the world's growing volume of disused tires. Compared to the conventional production of carbon black, the Pyrolyx method enables CO₂ emissions to be reduced by up to 2.5 tonnes per tonne of rCB. Pyrolyx's manufacturing operations take place within a closed recycling loop for the tire industry. Byproducts arising during production are reused either as fuel in the manufacturing process or to make other products, ensuring that nothing goes to waste.

Pyrolyx owns all the intellectual property rights to Pyrolyx environmental technology and has various patents concerning the industrial production of carbon black. Pyrolyx AG is quoted on the Düsseldorf Stock Exchange (WKN A0MFXR).
